According to § 1612 B para. 1 BGB the child benefit money is in principle to be credited to half of the table maintenance. The crediting of the child benefit is omitted, if the dependent is unable to pay maintenance in the amount of 135% of the standard amount (See section A note. 2.), so far as the child does not receive at least the standard rate of the 6th income group minus the half Child Benefit (§ 1612 B para. 5 BGB).

Child benefit up to income group 6 can be calculated according to the following formula:

Credit amount = $\frac{1}{2}$ of Child Benefit + standard rate of the respective income group-standard rate of the 6th income group (135% of the standard amount).
